

The 6

Essential Features

*FOR PREMIUM SLEEP.
FOUND IN EVERY
A.H. BEARD ORIGINS
MATTRESS.*

What should you look for when investing in a mattress? As bedmakers with over a century of experience, we believe it comes down to these six essentials, which create the ideal conditions for healthy, restorative sleep. You'll find all six in every A.H. Beard Origins mattress.

1. It just feels right

A blend of super soft Tencel® and organic cotton is bound to a deep layer of Australian wool with hand tufting that runs the full depth of the mattress. It creates a luxurious first impression that is repeated every time you go to bed.

2. All-over comfort

As you recline, sumptuous wool fibres and Comfort Coils* gently conform to your body's curves, helping to relieve pressure, prevent discomfort and keep you relaxed from dusk till dawn.

3. All-night support

While you sleep, every spring works independently to support your spine, creating the perfect posture for your body to rest, recover and rejuvenate.

4. A healthy sleep environment

The hypoallergenic and antimicrobial qualities of the naturally sourced fabrics and fibres create a healthy sleep environment. The Ultrashield treatment provides extra protection from mould, bacteria and dust mites.

5. Don't be disturbed

The comfort layers and independently supporting coils absorb the movements of others sharing your bed, helping reduce partner disturbance.

6. Temperature regulating

To keep you comfortable on warm nights, our craftsmen created internal airways to encourage the flow of air and help disperse heat. Fabrics and wool fibres were chosen for their natural wicking properties that draw heat and moisture from the skin.

*Comfort Coils are featured in models Planet Q1 and above
