A.H. BEARD[®] Nature's Rest

Inspired By Nature

The Nature's Rest collection draws on the Earth's best resources, such as Talalay Latex and wool, to provide a healthier, more natural sleep surface.

Customise your sleep experience. Simply select your preferred mattress feel - Super Firm or Medium, then add an optional Comfort Topper to create your perfect mattress.

Each Comfort Topper is reversible, with wool on one side and natural Talalay on the other. Wool helps naturally regulate temperature, while Talalay provides pressure relief and air circulation for a healthier, more comfortable sleep

PRESSURE-RELIEVING COMFORT

Talalay conforms to your body shape, relieving pressure that can cause tossing and turning, so you can enjoy a deeper, more restful sleep.

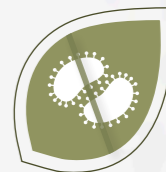

SLEEP COOL AND DRY

Tencel[®] fabric wicks away moisture, while wool naturally regulates temperature to keep you sleeping comfortably.

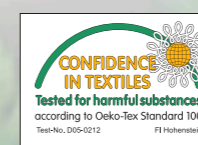

RESPONSIVE SUPPORT

Talalay supports your natural movements during sleep while reducing motion transfer, so you are less likely to be disturbed by the movements of your sleep partner.

HEALTHIER SLEEP

Talalay's open cell structure encourages air circulation, ensuring a healthier sleep environment that is free from mould, bacteria and other allergens. Talalay is naturally hypoallergenic, antimicrobial and dust mite resistant.

A family owned Australian business

Nature's Rest Verde Range Overview

- **Tencel** is a natural fibre, derived from eucalyptus trees. It naturally absorbs and wicks away moisture for a balanced sleeping environment, whilst minimising the growth of bacteria.
- **Wool Premium Fibre Layer** provides a high quality, durable, pressure relieving comfort layer. Wool is resilient, breathable and have the ability to naturally regulate body temperature.
- **Talalay Latex** provides pressure-relieving comfort and support that is naturally hypoallergenic and antimicrobial. The round, open cellular structure of Talalay provide superior elasticity and breathability, resulting in optimal support that relieves your body's pressure points whilst increasing ventilation for a comfortable sleeping environment.

Nature's Rest Verde Key Features and Benefits

TENCEL TEMPERATURE REGULATING FABRIC

Tencel is a new generation fibre which is natural in origin and designed with the environment in mind. Its design meets the challenging demands of the modern lifestyle by combining luxury, comfort and function. The extremely smooth surface of Tencel feels soft and pleasant to the skin.

Tencel fabric is desirable due to its high quality and practicality. It is breathable, absorbent and fully bio-degradable. The fabric naturally wick's away moisture, a process that draws moisture away from the body and releases it into the air to create a balanced sleeping environment, whilst also minimising the growth of bacteria.

Tencel is harvested from managed forests and derived from wood pulp which is a renewable raw material. It has a lower environmental impact in production than any other cellulosic fibre's and uses energy and water economically.

WOOL PREMIUM NATURAL FIBRE

Bedding made from natural fibre has long been recognised for delivering a better night's sleep. Natural fibres disperse moisture from the skin, providing even warmth and body temperature. They are also naturally flame-resistant.

Natural fibres are high quality, durable, pressure relieving comfort layers. Natural fibres are resilient, breathable and have the ability to regulate body temperature.

Pure Australian wools and fleece provide natural, healthy and rejuvenating comfort.

For centuries wool has been the fibre of choice to keep one's body warm. Initially used in clothing, wool then became popular as the comfort fibre in simple forms of beds and bedding.

Wool is commonly used in mattress comfort layers to provide comfort and regulate temperature. Being a natural fibre, wool is breathable as it can absorb up to 35% of its own weight in moisture. This makes wool ideal for those who sleep hot. Lavish layers of wool not only provide breathability and climate control for sleep comfort, but wool's natural crimp acts like springs, giving it resilient cushioning properties.

PREMIUM TALALAY LATEX

Latex is a milky white liquid, naturally produced in the sap of a Rubber Tree. The latex liquid is whipped with air to form a foam, which is heated to produce foam rubber, or latex as we know it today.

Latex is inherently hypo-allergenic, anti-microbial and dust-mite resistant. Good latex mattresses have pincore holes incorporated into the design that allow them to breathe. Because of the design, the latex breathes to remove body moisture, it keeps you warmer in the winter, and cooler in the summer.

The outstanding elasticity of latex makes it both supportive and comfortable. Its resilience and durability allows it to flex, bend and be stretched out time and time again, and still come back and perform the same way year after year.

Latex is produced by two different processes; the Talalay process and the Dunlop process. Both processes use the same basic ingredients, but the process of manufacturing is different and produces a different result and feel.

The latex featured in our product range is manufactured using the Talalay process. Talalay process is a highly controlled and sophisticated process that produces the highest quality, most consistent result and feel available.

The entire Talalay process takes 23 hours and 10 minutes.

NATURE'S REST VERDE DESIGNER BASE

Pair your Nature's Rest Verde mattress with a Nature's Rest Verde designer base to provide support for your mattress, increased stability and durability.

NATURE'S REST VERDE DRAWER BASE

Boost storage without cluttering up the room with a smart and practical drawer base. With the option of one or two drawers, depending on your base size, our space-saving storage bases provide you extra room for bedroom essentials.

Drawers hold up to 30kg and have a recessed, upholstered drawer front so they can be pulled out with ease. One drawer option is available in all bed sizes and two drawer option available for Double, Queen and King.
