

Harrison Spinks

The True Bedmakers

Harrison Spinks

The True Bedmakers

Our aim: To be world leaders
in sustainable comfort
innovation.

From our family, to yours

Family bedmakers since 1840.

Harrison Spinks is a fifth generation family business that today has over 600 employees; from farmers who rear our sheep to craftsmen and women who use time honoured skills to hand make each mattress.

We only ever make beds that we're
happy to sleep on ourselves.

RONNIE SPINKS, 1958

Sustainability?

Rest easy

We are striving to find more sustainable ways of working, so we can look after our planet for future generations. Knowing we're doing the right thing means we can all rest easy.

We grow nearly 800 tonnes of natural fibre filling materials per year, including hemp, flax and wool, on our own 300 acre farm in North Yorkshire.

We are proud of our Yorkshire roots, and sourcing from local suppliers allows us to champion businesses close to home, this in turn cuts our emissions.

We don't just make our own award-winning innovative springs, we make the machines that make them. Our patented and unique ultra-fast machines use 70% less power.

We have brought weaving back to Yorkshire, investing in state-of-the-art weaving looms, which in turn has allowed us to develop a chemical free mattress fabric, that we weave in-house.

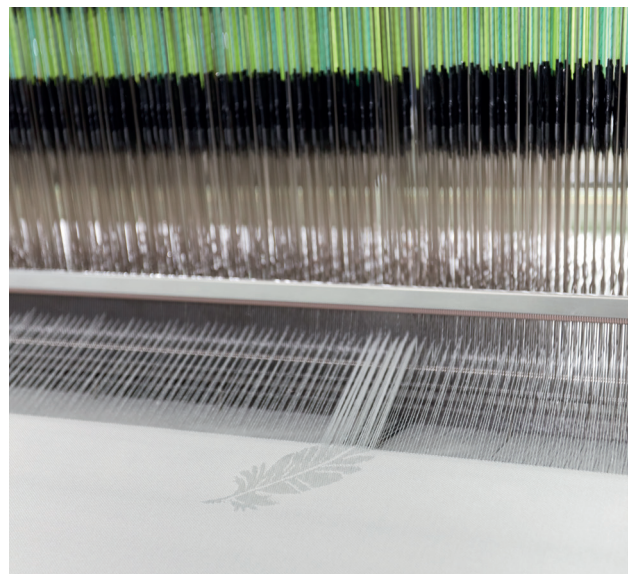

At Harrison Spinks we are committed to doing the right thing for a healthy lifestyle and a sustainable future so we can all rest easy at night.

That's why we have committed to a foam free future for all mattresses going into development and eliminate foam from any existing product from 2020.

SIMON SPINKS
MANAGING DIRECTOR

THROUGH PRODUCING AND
MANUFACTURING OUR
OWN MATERIALS WE'RE ABLE
TO SAVE OVER

1,300 TONNES
OF CO₂

EVERY YEAR

THERE ARE
HUNDREDS OF

SHEEP

ON THE HARRISON SPINKS FARM

Our beds don't start life
in a factory but on a
300 acre farm in
North Yorkshire.

In 2009 we purchased a farm just 18 miles away from
our factory in Leeds.

It is here that we rear sheep on rich untreated pastures
and tend fertile fields of hemp and flax crops. Our hemp
and flax crops produce super absorbent fibres that help
to absorb moisture from the mattress while you sleep,
keeping you cool and dry.

We use zero pesticides to grow our hemp and flax. Instead these fibres are grown the way we believe they should be: naturally. This greatly lessens the impact on the environment by reducing CO₂ emissions, which helps us and you rest easier.

EVERY ACRE OF
HEMP GROWN
ABSORBS

1 TONNE
OF CO₂
EACH YEAR

Luxurious ingredients

We pride ourselves on the ingredients we use in our mattresses. For us that means sourcing the finest environmentally friendly materials and eliminating the use of foam for more sustainable options, each one helping to achieve the ideal balance of comfort and support.

Wool

Soft, springy and naturally supportive, wool keeps you warm and dry, helping to regulate body temperature. In addition to being anti-bacterial and inherently fire retardant.

Hemp

Sourced from our own farm and other local farmers, hemp is grown completely natural and without the use of pesticides. The real beauty of this filling is that it is absorbent and naturally resistant to mildew. With excellent sustainable credentials, the hemp plant absorbs carbon dioxide and helps reverse climate change.

Flax

Flax is the fibre used to make linen and is three times stronger than cotton. Light and absorbent, it is a breathable organic filling, that helps to improve moisture management.

Cotton & Egyptian Cotton

Soft, durable and highly absorbent, cotton has strong moisture wicking properties. Egyptian cotton is softer and longer in length with its super fine strands, keeping you cool and dry.

Cashmere

Known for its supreme softness, cashmere is warm and lustrous but highly resilient. From the cashmere goat, the outer layer is durable while the soft under down of the goat is lighter and insulating.

Silk

A luxurious protein fibre, produced by the mulberry silkworm. Silk is the strongest of the natural fibres, with moisture absorbing qualities, making it perfect for regulating body temperature.

Mohair

With a fine and silky texture and great strength, mohair is softer and smoother than wool.

Handteased Horsehair

Horsehair is a versatile and sumptuous fibre that is durable, springy and hard-wearing.

Viscose

Often thought of as a man made fibre, viscose is derived from the wood pulp of eucalyptus, beech and pine trees. Versatile and lightweight, viscose blends well with other fibres, is breathable and highly absorbent.

We process
100% of the
natural fillings
in our own
factory.

Bringing weaving back to Yorkshire

In line with our ethos to be world leaders in sustainable comfort innovation, we not only grow our own natural fillings and draw our own wire, we also weave our own mattress fabric.

Here at our factory we combine traditional methods with state-of-the-art weaving looms to create naturally breathable fabrics for the sleeping surface.

Previously manufacturers have added chemicals to the surface of fabrics making them fire retardant. Our high quality woven fabric has a chemical free finish, using materials that boast inherently fire retardant properties. The fabric is then steam finished, meaning no other chemical treatments are required. An innovative but natural finish to the perfect night's sleep.

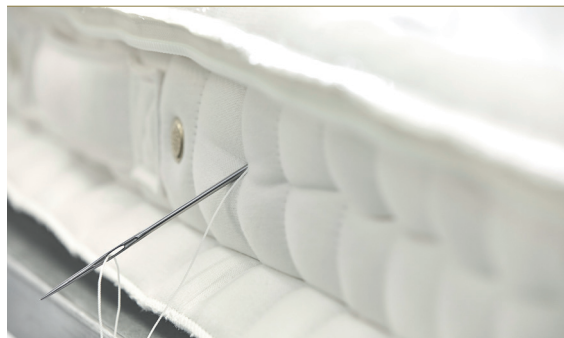

Hand-crafting luxury

All beds are handmade to order and tailored to each individual customer. To us, there's no such thing as one mattress fits all.

DARREN RHODES

GROUP MANUFACTURING DIRECTOR

Our team of craftsmen and women hand sew, side-stitch and tuft each bed.

Machines have their place. But sometimes nothing beats a trained eye and a skilled hand.

It can take our highly skilled side-stitchers almost 8 hours to hand stitch one of our luxury mattresses.

Inventors, innovators
and passionate
perfectionists
since 1840.

We see ourselves as the
NASA of the bed world.
We're forever pushing
the boundaries of
science to develop
truly ground-breaking
technology.

DAVE CLARE
DEVELOPMENT DIRECTOR

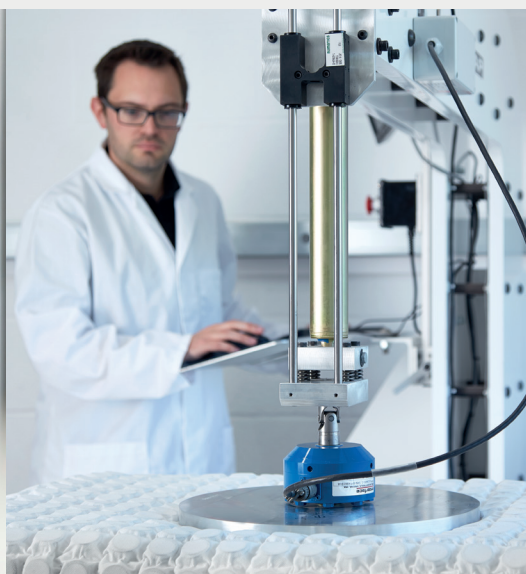

THE QUEEN'S AWARDS
FOR ENTERPRISE:
INNOVATION
2018

Innovation never sleeps at the Harrison Spinks factory

We don't just make springs, we make the machines that make our springs. Our Development Team of engineers design and build all our ultra-fast machines in-house at our Innovation Centre.

WE HAVE WORKED
WITH BRITISH STEEL
COMPANY TO DEVELOP
A UNIQUE GRADE
OF STEEL ROD THAT
ALLOWS US TO DRAW
ULTRA-FINE WIRE AT
OUR OWN SITE.

Inside every bed we make, there are several thousand miracles of engineering at work. Precision made springs-within-springs and high-density pocket springs made with titanium alloy wire. It's the most innovative support technology you'll find anywhere in the world. Technology that makes every night's sleep the best you've ever had.

Revolution Springs

A unique award-winning system with a small spring sitting inside a larger one, offering two levels of firmness and adding to the life and performance of your mattress. Its two stage action means the outer spring offers a high degree of comfort, while the inner spring delivers a supportive second action. This gives variable levels of support, tailoring itself to your unique shape. It's one spring that gives twice the comfort.

HD Airflow

Airflow does exactly what its name suggests, channelling air through the mattress fillings and directing it to the surface, helping the mattress to breathe and keeping the fibres fresh and dry whatever the season.

Made with lightweight titanium alloy, HD springs are highly flexible, working completely independent of each other. Their three dimensional support means they can adapt to your body's contours to relieve pressure and give greater comfort and lumbar support.

Posturfil

Flexible low height springs encased in breathable pockets for enhanced ventilation. Posturfil pocket springs react instantly to the sleeper's movements, providing targeted support, relieving pressure and promoting spinal alignment.

Good sleep is the foundation of health & wellbeing

When we are lying down, ideal posture can only be achieved when the 33 bones in our spinal column are perfectly aligned.

Good posture is the key to a good night's sleep.

Whether you sleep on your front, back or side, the most important thing to consider when buying your bed is support.

JUST RIGHT

TOO SOFT

TOO FIRM

THE BED TAILOR COLLECTION

Sleep is special, so we don't think it should come off the shelf.
We think it should be tailored to you.

Nature and technology blend seamlessly in our exquisite Bed Tailor Collection. Beautiful beds that are timeless in their design, yet thoroughly modern in their construction. Each one is individually handcrafted. Every strand of sumptuous cashmere and silk specifically chosen to offer maximum comfort. Each spring providing the most advanced support – all carefully arranged in our unique nested design.

At Harrison Spinks, we don't just make beds.
We make a great night's sleep.

WARM SIDE

The Warm Side of your mattress has a wool blend near the sleeping surface.

On this side of the mattress, the wool blend will help keep you warm and comfortable throughout the cooler months of the year.

THERE ARE TWO SIDES
TO EVERY MATTRESS.

COOL SIDE

The Cool Side of your mattress has a cotton blend near the sleeping surface.

On this side of the mattress, the cotton blend will keep you fresh and dry in the warm months as the cotton helps to wick away moisture.

BED TAILOR **ULTIMATE** COLLECTION

WILTSHIRE 29500

MATTRESS SPRING COUNT 27000

The Wiltshire is the ultimate expression of sleeping luxury. Featuring our unique nested Revolution spring system at its core, it is boosted by ten layers of tiny HD titanium alloy springs, creating a total of 27000 springs that each work independently. They help to distribute weight evenly across the sleep surface and minimise pressure on the body, which can disturb your sleep. Choose from gently supportive, medium support or firm support.

Layers of cashmere, wool, silk, Egyptian cotton, hand-teased Yorkshire wool, hemp and flax are all kept in place with no less than five rows of hand side-stitching. Creating the most exquisite of mattresses, and the soundest of sleeps.

ROCHESTER 24500

MATTRESS SPRING COUNT 22000

The Rochester is one of the jewels in the Harrison Spinks crown. A bed that offers both technologically advanced support from its 22000 springs, and comfort that must be experienced to be believed. This sumptuous mattress has four rows of side-stitching which keeps the fillings locked in to a supremely supportive position. Choose from gently supportive, medium support or firm support.

The interior features a blend of the finest natural wool and silk available in a mattress. With separate layers of hand-teased Yorkshire wool and cashmere, the result is unparalleled comfort and relaxation.

NORTHAMPTON 19500

MATTRESS SPRING COUNT 17000

The Northampton is a luxurious sleeping experience. Support is provided by its 17000 springs, including a nested Revolution support core and our lightweight titanium alloy springs. The quadruple side-stitching ensures you're supported right up to the edge of the sleeping surface, offering great stability over the lifetime of the mattress. Choose from gently supportive, medium support or firm support.

Working hand in hand with the springs are layers of hand-teased Yorkshire wool and cashmere. This regal blend of fillings offers a highly tailored and sumptuous level of comfort.

Enjoy an award-winning night's sleep

Our commitment has even been recognised by Her Majesty Queen Elizabeth II. In 2019 we were awarded our third Queens Award for Enterprise.

“The Awards recognise the commitment to excellence that we all share at Harrison Spinks and reflect the fact that innovation and sustainability are at the very heart of what we do. Our family business is dedicated to continuous improvement, so we will remain focused on developing products that enhance comfort whenever they can be applied.”

SIMON SPINKS, MANAGING DIRECTOR
